For more detailed information on FXCM Trading Stations, refer to PDS Part 2.

**Spreads**

Generally, for FX, FXCM earns its income from markup to the spread or the commission charged per 100k trade (per side). In certain circumstances, Client may be subject to a markup, separate commission rates and/or a separate rate card due to the relationship with a third party (including but not limited to some referring brokers). The term “spread” refers to the difference between the best bid and best offer rates at which you buy and sell the financial instruments.
Rebates and Commissions to Referring Brokers/third parties

FXCM may compensate Referring Brokers/third parties for introducing clients to FXCM and that such compensation may be on a per-trade basis or any other method upon FXCM’s discretion. Such compensation will be taken out of Client’s commission payment for FX and will be taken out of FXCM’s mark-up for other products. For CFDs, generally, FXCM’s compensation to Referring Brokers for introducing clients ranges from approximately 0.25 pips to 5 pips per round turn trade. For FX, commission paid to referring brokers will generally be 50% of the applicable commission (see commission rates detailed in the FX PDS).

(For more detailed information on pips, please refer to the Product Disclosure Statement, in the section “Pip Cost”.)

All clients will be asked to agree to rebates/commissions charges prior to any such rebates/commissions being charged, via an acknowledgement form.

Where you enter into a transaction you will be required to pay an initial margin. You may also be required to pay additional margin in the event of adverse market movements against your position(s). Such payments are not fees or costs but are funds required by FXCM to cover our risk and as security for the client’s obligations.

Rollover Fees

You will also be charged a “rollover” fee for holding FX Contracts and CFDs overnight. These fees vary from day to day.

CFD Rollover - Metals Trading

All open metal positions are rolled to the next trading day. Depending on whether you are long (Buy) or Short (Sell), you will either be debited or credited rollover interest on a daily basis. Details of FXCM’s rollover rates (rolls) are detailed on the trade station in a transparent manner. Please note that at all open positions at the close of business on Thursday at 8.00 AEST incur a 3 day rollover debit/credit, and bank holidays will affect the number of days that a position is rolled forward. Furthermore, the rollover detailed on Trading Station is for 1 ounce of gold or silver and not the minimum trade size.

Copper is the only metal which is not subject to rollover interest.

CFD Rollover - Energy Trading

Since the US Oil, UK Oil, and NGAS products that FXCM offers are in fact a forward product, no overnight credits/debits or dividends are applicable.

CFD Rollover - Indices

Financing costs (Cost of carry) and dividends make up the overnight credits/debits. The value of these two variables are independent of one another; the overall credit/debit that is credited/debited will depend on the size of the open trade.

Interest rates are a factor in any market. FXCM’s daily interest debit or credit amounts (herein, “rollover”) are based on the total face value the position. Our rollover rates are calculated by referencing the relevant LIBOR for all index products. Each day, the rollover amounts per lot are shown transparently in the simple dealing rates window.
Administrative Fees

With respect to Telegraphic Transfers or Wire Fees, FXCM does not charge a fee in order to setup your Account or to deposit funds. However, FXCM will charge an administrative charge in order to withdraw funds from your Account. Wire request fees are as follows:

<table>
<thead>
<tr>

</tr>
<tr>

<td>3,000</td>
</tr>
</tbody>
</table>

*Domestic wire fees apply when the client’s beneficiary bank is located in Australia.

You will be charged a dormancy account administrative fee (the “Fee”) every calendar year if there is no client-initiated activity in the 12 months preceding the charge date. This fee will be equal to the lesser of 50.00 units of the currency in which your account is denominated or the remaining balance in your account, with the exception of accounts denominated in JPY, which will be charged JPY 5,000. If you are assessed the Fee, and your account balance becomes zero (0) and maintains the zero (0) balance for six (6) consecutive months, your account will automatically be closed.

Conversion Fees

Any administrative conversions will made at the bank rate or at the prevailing spot rate shown on the FXCM Trading Stations when the transaction is completed by FXCM. The following markup will apply. The pip charge will be determined by the amount converted (USD equivalent).
