

FXCM CFD PRODUCT GUIDE

November, 2023

Notice

This product summary should be read in conjunction with our Terms of Business. Whilst every effort has been made to ensure the accuracy of the guide, this information is subject to change, often without notice and therefore is for guidance only. If you ever have any questions please contact FXCM directly.

Stratos Markets Limited
info@fxcm.co.uk

Risk Warning

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage.

67% of retail investor accounts lose money when trading CFDs with this provider.

You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Trading leveraged Contracts For Difference ("CFD"), Spread Betting ("spread betting") and Foreign Exchange (forex) trading carries a high level of risk and may not be suitable for all investors. The products are intended for retail, professional, and eligible counterparty clients. Retail clients who maintain account(s) with Stratos Markets Limited ("FXCM") could sustain a total loss of deposited funds but are not subject to subsequent payment obligations beyond the deposited funds but professional clients and eligible counterparty clients could sustain losses in excess of deposits. Prior to trading any products offered by FXCM, inclusive of all EU branches, any affiliates of aforementioned firms, or other firms within the FXCM group of companies [collectively the "FXCM Group"], carefully consider your financial situation and experience level. The FXCM Group may provide general commentary, which is not intended as investment advice and must not be construed as such. Seek advice from a separate financial advisor. The FXCM Group assumes no liability for errors, inaccuracies or omissions; does not warrant the accuracy, completeness of information, text, graphics, links or other items contained within these materials. Read and understand the Terms and Conditions on the FXCM Group's websites prior to taking further action.

Stratos Markets Limited ("FXCM") is authorised and regulated in the UK by the Financial Conduct Authority. Registration number 217689. Registered in England and Wales with Companies House company number 04072877.

Important Information: Stratos Markets Limited ("FXCM") offers spread betting exclusively to UK and Ireland Residents. Residents of other countries are NOT eligible. Spread betting is not intended for distribution to, or use by any person in any country and jurisdiction where such distribution or use would be contrary to local law or regulation.

FXCM's products are not offered in any way in connection with, or with the endorsement of the relevant underlying exchange. The use of the word futures contract and relevant exchange by FXCM is simply in order to indicate the characteristics of the product on offer and the characteristics of the service.

A CFD, spread bet and forex allows you to potentially profit or lose from the fluctuations in the price of the underlying instrument. The price of is based on the price of the underlying instrument and is not traded on an exchange, despite the status, or location of the underlying instrument. Therefore, CFD, spread bets and forex are an over-the-counter (OTC) products, and you are trading with FXCM as the counterparty to all transactions you undertake.

Please note that commensurate with the opening/closing of the market for the underlying instrument, traders may experience gaps in market prices. Due to the volatility expressed during these time periods, trading at the open or at the close, can involve additional risk and must be factored into any trading decision. These time periods are specifically mentioned because they are associated with the lowest

levels of market liquidity and can be followed by significant movements in prices for both the product, and the underlying instrument.

There is a substantial risk that stop-loss orders, left to protect open positions held overnight, may be executed at levels significantly worse than their specified price.

IMPORTANT INFORMATION:

Exceptional Events

During Exceptional Events (as per our [Terms of Business](#)), we may take such action as reasonably required, including but not limited to amending trading times or margin requirements, closing or cancelling trades and orders, or suspending trading on any product or market.

Trading Restrictions

In times of high volatility and low liquidity there may be instances where one direction of trading (long or short) is not permitted or new positions are unable to be opened. During any period in which such a trading restriction is applied, market orders or triggered pending entry orders will be rejected and deleted. We may change the trading status of a particular instrument at any time and without prior notice.

Negative Pricing

FXCM will not support negative prices on our products and reserve the right to cease trading when market prices reach zero or when we reasonably anticipate negative prices. In such event, we may close all open positions at the best available price.

50 FXCM Soybean contracts are currently equivalent to one Soybean Future.

Other Information

Soybean has no financing cost (Rollover).

There is no minimum stop distance

CORNF

The underlying instrument for CORNF is the Corn Futures contract.

Corn is a cereal grain predominantly produced in the United States. Corn's price is driven largely by the demand for Corn ethanol (a renewable fuel source), climate in areas of large production (US, China, South America) and is often correlated with the performance of the US Dollar as well as both the Commodity and Energy sectors.

Margin Requirements

Trading Hours, Expiration and Reference Month

Please [click here](#) for trading hours. Please note, however, that hours are subject to change based on Daylight Savings Time. Any holiday hours will be posted [here](#). FXCM expiration dates and current reference month for CORNF are located in the [FXCM CFD Expiration PDF](#).

If you have an open position, the reference month you are trading will not be changed, although expiration dates may be amended. Upcoming reference months may be changed with no prior notice. Please ensure you are aware of which reference month is currently being priced, prior to opening a trade.

Clients that hold an open position on the 'FXCM Expiration' will be closed at our bid/offer at 17:00 New York time for CORNF, which means the client will realise any floating P/L at the time it is closed. When CORNF expires, all pending Entry orders and Stop/Limit orders that are associated with the expiring contract will be cancelled. Clients will need to re-establish another position if desired after the expiration and reinsert Stop and Limit orders to the new open position.

Target Spread

CORNF has a target spread of **11.6 pips/points**

Max Contract Size

The maximum number of contracts per click (trade) for CORNF is **500**

Minimum Pip Cost (Value)

CORNF has a minimum value of \$0.10 per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value). The pip/point location is shown in the diagram. Each 0.1 price movement on CORNF is 1 pip/point. FXCM's pricing displays an additional decimal place - ideal for scalpers in a fast-moving market.

379.75

Number of FXCM Contracts to Equal 1 Future

50 FXCM CORNF contracts are currently equivalent to one Corn Future.

Other Information

CORNF has no financing cost (Rollover). **There is no minimum stop distance**

LCattleF

The underlying instrument for LCattleF is the Live Cattle Futures contract.

Live Cattle Futures is designed for traders to hedge/speculate the price movement of market-ready cattle, which could be affected by weather, other commodities prices e.g. soybeans, and consumer incomes etc.

METALS

FXCM offers CFD contracts metals with convenient contract sizes.

To view current margin requirements, visit the below link:
<https://www.fxcm.com/uk/trading-details/margin-updates/>

INSTRUMENT NAME	MIN. TRADE SIZE	MAX. TRADE SIZE	PIP COST	TARGET FXCM SPREAD	MINIMUM STOP DISTANCE
XAU/USD	1	10,000	\$0.01	41	0
XAG/USD	1	200,000	\$0.01	4.32	0
Copper	1	500	\$0.10	4.2	0

For CFD Trading Hours, please refer to the FXCM Trading Hours PDF:

<https://docs.fxcorporate.com/user-guide/FXCMCFDTradingHours.pdf>

XAU/USD - GOLD

Gold is traded in the spot market, and the Gold Spot price is quoted as US Dollar per Troy Ounce. Since 1919 the most common benchmark for the price of gold has been the London gold fixing, a twice-daily telephone meeting of representatives from five bullion-trading firms of the London bullion market. Gold is traded continuously throughout the world based on the intra-day spot price, derived from over-the-counter gold-trading markets around the world (code "XAU").

<https://www.fxcm.com/uk/margin-updates/>

Trading Hours

Refer to the FXCM CFD Trading Hours PDF at:

<https://docs.fxcorporate.com/user-guide/FXCMCFDTradingHours.pdf>

Please note, however, that hours are subject to change based on Daylight Savings Time. FXCM CFDs will not be open for trading during [holidays](#) in which the reference markets are closed. XAU/USD is a spot product so there is no expiration.

Target Spread

XAU/USD has a target spread of **41 pips/points**.

Keep in mind the minimum pip/point value for XAU/USD is 0.01.

Max Contract Size

The maximum number of contracts per click (trade) for XAU/USD is **10,000**.

Minimum Pip Cost (Value)

XAU/USD has a minimum value of \$0.01 per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value).

The pip/point location is shown in the diagram. Each 0.01 price movement on XAU/USD is 1 pip/point.

1,234.42

Other Information

XAU/USD does have a financing cost (Rollover) which is usually 3x on Wednesdays like FX pairs.

XAG/USD - Silver

The price of silver is driven by speculation and supply and demand; mainly by large traders or investors, short selling, industrial, consumer and commercial demand, and to hedge against financial stress. Compared to gold, the price of silver is notoriously volatile. This is because of lower market liquidity, and demand fluctuations between industrial and store of value uses. At times this can cause wide ranging valuations in the market creating volatility.

Trading Hours

Refer to the FXCM CFD Trading Hours PDF at:

<https://docs.fxcorporate.com/user-guide/FXCMCFDTradingHours.pdf>

Please note, however, that hours are subject to change based on Daylight Savings Time. FXCM CFDs will not be open for trading during [holidays](#) in which the reference markets are closed. XAG/USD is a spot product so there is no expiration.

Target Spread

XAG/USD has a target spread of **4.32 pips/points**.

Max Contract Size

The maximum number of contracts per click (trade) for XAG/USD is **200,000**.

Minimum Pip Cost (Value)

XAG/USD has a minimum value of \$0.01 per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value).

The pip/point location is shown in the diagram. Each 0.01 price movement on XAG/USD is 1 pip/point. FXCM's pricing displays an additional decimal place - ideal for scalpers in a fast-moving market.

16.214

Other Information

XAG/USD does have a financing cost (Rollover) which is usually 3x on Wednesdays like FX pairs.

Copper

COMEX Copper is widely considered as one of the key cyclical commodities, given its extensive usage in construction, infrastructure and an array of equipment manufacturing. The biggest end-use is for the production of cables, wiring and electrical goods because of its excellent electricity-conducting properties. The construction sector is the second largest user of copper, for plumbing, HVAC and building wiring applications. Although found in abundance and widely extracted as well as recycled, the copper value chain is quite capital intensive. This makes the market susceptible to supply-side constraints, and therefore, volatile price fluctuations.

Please [click here](#) for trading hours. Please note, however, that hours are subject to change based on Daylight Savings Time. Any holiday hours will be posted [here](#). FXCM expiration dates and current reference month for EURIBOR3M are located in the [FXCM CFD Expiration PDF](#).

If you have an open position, the reference month you are trading will not be changed, although expiration dates may be amended. Upcoming reference months may be changed with no prior notice. Please ensure you are aware of which reference month is currently being priced, prior to opening a trade.

Clients that hold an open position on the 'FXCM Expiration' will be closed at our bid/offer at 17:00 New York time for EURIBOR3M, which means the client will realise any floating P/L at the time it is closed. When EURIBOR3M expires, all pending Entry orders and Stop/Limit orders that are associated with the expiring contract will be cancelled. Clients will need to re-establish another position if desired after the expiration and reinsert Stop and Limit orders to the new open position.

Target Spread

The EURIBOR3M has a target spread of **1.5 pips**.

Max Contract Size

The maximum number of contracts per click (trade) for EURIBOR3M is **500**.

Minimum Pip Cost (Value)

The EURIBOR3M has a minimum value of 0.10 EUR per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value). The pip/point location is shown in the diagram. Each 0.01 price movement on the EURIBOR3M is 1 pip/point. FXCM's pricing displays an additional decimal place - ideal for scalpers in a fast-moving market.

163.480

Number of FXCM Contracts to Equal 1 Future

250 FXCM EURIBOR3M Contracts are equivalent to one EURIBOR 3 Month Future.

Other Information

The EURIBOR3M has no financing cost (Rollover) and there is no minimum stop distance

BUND

The underlying instrument of the BUND, the Euro-Bund Futures Index portfolio, holds the nearest maturity Euro-Bund Futures contract and consists of German government bonds.

Other Information

The SONIA3M has no financing cost (Rollover) and there is no minimum stop distance

CRYPTOCURRENCY

Cryptocurrencies are not available for Retail Clients

Bitcoin (BTC/USD, BTC/AUD, BTC/EUR, BTC/GBP)

Bitcoin is a global form of digital currency. Unlike traditional currencies, which were frequently backed by gold and silver, bitcoin is based on distributed computing. While traditional currencies are printed by central banks, bitcoins are created or “mined” by distributed computer networks.

Another way bitcoin differs from traditional currencies is that it is decentralized, meaning that it is not controlled by any single institution. As a result, miners around the world create new units of the currency and confirm its transactions.

Trading Hours

Please [click here](#) for trading hours.

Please note, however, that hours are subject to change based on Daylight Savings Time. Any holiday hours will be posted on [here](#).

Spread

BTC has variable spreads that will widen and narrow subject to market conditions.

Max Contract Size

The maximum number of contracts per click (trade) for BTC is 500.

Minimum Pip Cost (Value)

BTC has a minimum value of 0.01 CCY per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value).

The pip/point location is shown below. Each 1.00 price movement on BTC is 1 pip/point.

7054.32

Number of FXCM Contracts to one Bitcoin

100 FXCM BTC contracts are currently equivalent to one Bitcoin.

Margin Requirements

BTC Margin Requirements are updated shortly after market open (Sunday 18:00 ET) and then between 17:00 ET to 18:00 ET daily.

BTC is leveraged at 2:1 and the new margin requirement will be the equivalent of half of the notional value of 1 contract at 5pm EST.

For E.G if the BTC/USD rate is 40000.00 between 17:00 ET to 18:00 ET daily, the Margin Requirement for one contract will be updated to \$200.00 USDBTC is a volatile instrument and in the event that there is a significant intraday market move, margin requirements may be updated intraday

Overnight Funding

BTC does have an overnight funding charge (Displayed as Rollover in the Trading Station Platform). The current overnight funding rate is 0% (annually) for short positions and -25% (annually) for long positions and is 3x on Fridays.

Trade Restrictions

FXCM allows long and short trading on all our trading catalog.

However due to the high volatility and low liquidity when trading crypto currencies, there may be instances where new positions are unable to be opened on Bitcoin.

During any period in which Bitcoin has a trading restriction applied, any market orders or triggered pending entry orders will be rejected and deleted.

Pop ups will appear on your screen informing of the reason for the rejection.

Any restrictions are temporary and will only impact your ability to enter trades.

You will still be able to close open positions.

Other Information

BTC does not have a minimum stop distance

Stops and Limits are currently only able to be set at 50% of the rate.

Cryptocurrencies are not available for Retail Clients

Bitcoin Cash (BCH/USD)

Bitcoin Cash is a cryptocurrency that forked from Bitcoin in 2017. It's one major difference in that the blocks in bitcoin cash's blockchain allow far more space and therefore have the capacity to hold significantly more transactions.

Trading Hours

Please [click here](#) for trading hours.

Please note, however, that hours are subject to change based on Daylight Savings Time. Any holiday hours will be posted on [here](#).

Spread

BCH/USD has variable spreads that will widen and narrow subject to market conditions.

Max Contract Size

The maximum number of contracts per click (trade) for BCH/USD is 1000.

Minimum Pip Cost (Value)

BCH/USD has a minimum value of 0.10 USD per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value).

Stops and Limits are currently only able to be set at 50% of the rate.

Cryptocurrencies are not available for Retail Clients

Ether (ETH/USD, ETH/AUD, ETH/EUR)

Ether is the digital currency used by Ethereum, a decentralised platform that runs smart contracts.

Ether is the fuel or “gas” used to pay for transactions made on the Ethereum platform. Ether gives participants a reason to contribute resources used by the platform, thereby ensuring a robust network. Further, it provides developers with incentive to write efficient code, as inefficient software programs are more expensive.

BASKETS

FOREX BASKETS

USDOLLAR

The Dollar Index Basket (USDOLLAR) was developed by traders for traders allowing you to take advantage of US Dollar appreciation or depreciation with precise tracking and maximum liquidity.

The index basket is designed to be as easy to understand as it is to trade. It reflects the change in value of the US dollar measured against a basket of the most liquid currencies in the world:

AS OF INCEPTION DATE 1/1/2011

The Dollar Index began on January 1, 2011, at a value of 10,000. It represents an equivalent \$10,000 position in each of the currencies that make it up. It rises when the Dollar rises against the Euro, the British Pound, Yen and the Australian Dollar and falls as the Dollar depreciates compared to these currencies.

Margin Requirements

Margin Requirement's may differ depending on account type and can be viewed in the Dealing Rates and create order windows on the trading station or by clicking [here](#).

Trading Hours

FXCM's trading hours vary by product. For forex and USDOLLAR, trading opens on Sundays between 5:00 PM ET and 5:15 PM ET and closes on Fridays around 4:55 PM ET.

Maximum Contract Size

The maximum number of contracts per click (trade) for the USDOLLAR is **200**.

Minimum Pip Cost (Value)

USDOLLAR has a minimum value of \$1 per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value). The pip/point location is shown below.

12,321

Other Information

The USDollar does have financing cost (Rollover). The Rollover is taken directly from the variable rollover rates of the individual FX components and then multiplied by that components current weighting in the Index. To see today's rollover rate please view the Dealing Rates in the trading station.

USDollar has no minimum stop distance.

In the event that one of the individual components of the Basket does not receive a price update for 1 minute, the USDollar will become temporarily untradeable. This may result in hanging orders on TS2 or Rejected orders on MT4. We recommend trading with caution around Market Open and Close and any other period of low liquidity.

JPYBasket

The JPYBasket ("Yen Index") is a Japanese Yen benchmark and is designed to reflect the change in value of the JPY against a basket of major world currencies. The Index was developed by FXCM.

JPYBasket - The Yen Index
as of inception date 02/01/2019

The JPYBasket began on January 2, 2019, with a rate of 10,000. It represents an equivalent ¥200,000 position in each of the currencies that make up its components for a total starting value of ¥1,000,000 .

It rises when the Yen strengthens against the US Dollar, Euro, the British Pound, Canadian Dollar and the Australian Dollar and falls as the Yen weakens compared to these currencies.

In order for the Index to have a starting value of 10,000, the JPY basket uses divisor of 100.

For example, if you Buy 1 contract and subsequently the Yen strengthens and the Index rate increases from 10,100 to 10,101, you will earn exactly 100JPY for every point change (or equivalent value in your account denomination).

Margin Requirements

Margin Requirement's may differ depending on account type and can be viewed in the Dealing Rates and create order windows on the trading station or by clicking [here](#).

Trading Hours

FXCM's trading hours vary by product. For forex and JPYBasket, trading opens on Sundays between 5:00 PM ET and 5:15 PM ET and closes on Fridays around 4:55 PM ET.

Maximum Contract Size

The maximum number of contracts per click (trade) for the JPYBasket is **200**.

Minimum Pip Cost (Value)

JPYBasket has a minimum value of 100 JPY per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value). The pip/point location is shown below.

12,321

Other Information

The JPYBasket does have financing cost (Rollover). The Rollover is taken directly from the variable rollover rates of the individual FX components and then multiplied by that components current weighting in the Index. To see today's rollover rate please view the Dealing Rates in the trading station.

JPYBasket has no minimum stop distance.

In the event that one of the individual components of the Basket does not receive a price update for 1 minute, the JPYBasket will become temporarily untradeable. This may result in hanging orders on TS2 or Rejected orders on MT4. We recommend trading with caution around Market Open and Close and any other period of low liquidity.

EMBasket

The EMBasket ("Emerging Markets Index") is an Emerging Markets benchmark and is designed to reflect the change in value of the USD against a basket of minor world currencies. The Index was developed by FXCM.

EMBasket - The Emerging Markets Index
as of inception date 02/01/2019

The EMBasket began on January 2, 2019, with a value of 10,000. It represents an equivalent \$2,500 position in each of the currencies that make it up. It rises when these currencies strengthen against the US Dollar and lowers as they weaken.

The EMBasket is a great way to speculate on often volatile instruments while lowering the risk of taking exposure on just one currency.

Margin Requirements

Margin Requirement's may differ depending on account type and can be viewed in the Dealing Rates and create order windows on the trading station or by clicking [here](#).

Trading Hours

FXCM's trading hours vary by product. For forex and EMBasket, trading opens on Sundays between 5:00 PM ET and 5:15 PM ET and closes on Fridays around 4:55 PM ET.

Maximum Contract Size

The maximum number of contracts per click (trade) for the EMBasket is **200**.

Minimum Pip Cost (Value)

EMBasket has a minimum value of \$1 per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value). The pip/point location is shown below.

↓
12,321

Other Information

The EMBasket does have financing cost (Rollover). The Rollover is taken directly from the variable rollover rates of the individual FX components and then multiplied by that components current weighting in the Index. To see today's rollover rate please view the Dealing Rates in the trading station.

EMBasket has no minimum stop distance.

In the event that one of the individual components of the Basket does not receive a price update for 1 minute, the EMBasket will become temporarily untradeable. This may result in hanging orders on TS2 or Rejected orders on MT4. We recommend trading with caution around Market Open and Close and any other period of low liquidity.

STOCK BASKETS

US Stocks

FXCM's Stock Baskets contain a number of individual stocks relating to a specific sector.

At the time of the baskets inception, each stock was given a value in \$ terms. The baskets will from that point forward measure the collective performance of each of the correlated components.

For example:

FAANG's original price was \$2,000 and Netflix represented \$400 of that \$2,000.

If today that same amount of Netflix shares that were worth \$400 is now worth \$415, that stocks contribution to FXCM's FAANG price will be 415.

The contribution of each of the stocks will formulate the current rate of a Stock Basket.

Margin Requirements

Margin Requirements are updated daily during the market break.

Most Stock Baskets are leveraged at approximately 5:1 and the new margin requirement will be the equivalent of approximately 20% of the notional value of 1 contract.

For E.G if the FAANG rate is 2000.00 during the market break, the Margin Requirement for one contract will be updated to \$400.00 USD

Trading Hours

Please [click here](#) for trading hours.

Please note, however, that hours are subject to change based on Daylight Savings Time. Also, FXCM's Stock Baskets do not expire, but will not be open for trading during [holidays](#) in which the reference markets are closed.

Maximum Contract Size

The maximum number of contracts per click (trade) for all Stock Baskets is **200**.

Minimum Pip Cost (Value)

Stock Baskets have minimum value of \$1 per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value). The pip/point location is shown below.

1,970.50

Rollover

Stock Baskets do have financing cost (Rollover).

For more information on financing costs, please refer to:

<https://www.fxcm.com/uk/help/cfd-trading-what-is-the-index-cfd-financing-cost/>

Dividends and Withholdings

Dividend adjustments will apply on the eve of the ex-dividend date of the constituent members of the relevant Basket. The adjustment will appear on your statement and the amount of the adjustment per contract can be seen in the simple dealing rates window of the Trading Station platform in the day prior to the debit/credit.

As per Section 871 of the US tax code. A 30% tax applies on dividend adjustments to traders of equity derivatives of US stocks. In accordance with FXCM's obligation under this US tax regulation, 30% of all Dividend credits are withheld and passed on by FXCM to the IRS.

When your account is debited, you are debited the full amount. However FXCM subsequently pass on 30% of that debit to the IRS.*

* This tax treatment is applied by default to all positions and may be subject to change in the future. Rebates may be available depending on your individual tax and residency circumstances, or may differ based on the respective jurisdiction. Please contact FXCM support if you believe you may be entitled to a rebate for additional information you will need to provide. This information is for references purposes only, and reliance on the information contained herein is not an alternative to legal advice from an attorney or other professional legal/accounting services provider. This information is not intended as a financial or an investment advice and must not be construed as such. Seek advice from a separate financial advisor. FXCM assumes no liability for errors, inaccuracies or omissions; does not warrant the accuracy, completeness of the information or other items contained within these materials.

<https://www.fxcm.com/uk/help/cfd-trading-stock-basket-dividends-and-withholdings/>

Other Information

In the event that one of the individual components of a Basket does not receive a price update for 1 minute, the Basket will become temporarily untradeable. This may result in hanging orders on TS2 or Rejected orders on MT4. We recommend trading with caution around any period of low liquidity.

In the event of significant drawdown of one of the components or a corporate action, the Baskets may require a periodic rebalancing. In the event of a rebalancing a component of the basket may be replaced or all open positions may be closed with little or no notice.

***Currently AIRLINES, CASINOS, US.ECOMM, US.AUTO, US.BANKS, TRAVEL and WFH are only available on Trading Station accounts.**

Withholding Rebates

As per Section 871 of US tax code, a withholding tax applies on dividend adjustments to traders of equity derivatives of US stocks.

In accordance with FXCM's obligation under these US tax rules, 30% of all credited Dividend adjustments on US Shares, ETFs or Stock Baskets are withheld and passed on by FXCM to the IRS.

If you are a taxpayer in a jurisdiction where a tax treaty exists that permits a lower withholding percentage and you qualify for the treaty benefit, you can submit a W-8BEN form (or other W-8 form based on your entity type) and FXCM will provide an adjustment to your account in the form of monthly rebate.

How to submit?

- Log in to [MYFXCM](#).
- Select "Upload Documentation" from the "My Info" dropdown.
- Choose "Other" and Provide details that you are "submitting W-8 for a reduction in withholdings."

Please Note:

- I. FXCM will confirm to you via email that your form has been processed.
- II. Rebates for the previous month will generally be credited within 2 weeks of the end of the month.
- III. FXCM Customer service staff are unable to provide you tax advice based on your individual circumstance or location.
- IV. Your details will remain valid for 3 years unless your tax or residency circumstances change, however eligibility may be subject to change without notice.

HK Stocks

FXCM's HK Stock Baskets contain a number of individual stocks relating to a specific sector. At the time of the basket inception, each stock was given a value in HKD \$ terms. The baskets will from that point forward measure the collective performance of each of the correlated components. For example:
ATMX's original price was \$16,000 and Tencent represented \$4,000 of that \$16,000. If today that same amount of Tencent shares that were worth \$4,000 is now worth \$4,150, that stocks contribution to FXCM's ATM price will be \$4,150.
The contribution of each of the stocks will formulate the current rate of a Stock Basket.

Margin Requirements

Margin Requirements are updated daily after the market close. Currently HK Stock Basket is leveraged at approximately 5:1 and the new margin requirement will be the equivalent of approximately 20% of the notional value of 1 contract. For example, if the ATM is 16,000 during the market break, the Margin Requirement for one contract will be updated to HKD 3200.

Trading Hours

Please [click here](#) for trading hours. Please note, however, that hours are subject to change based on Daylight Savings Time. Also, FXCM's Stock Baskets do not expire, but will not be open for trading during [holidays](#) in which the reference markets are closed.

Maximum Contract Size

The maximum number of contracts per click (trade) for HK Stock Baskets is 500.

Minimum Pip Cost (Value)

HK Stock Baskets have minimum value of HK\$1 per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value). The pip/point location is shown below.

16,000.00

Rollover

HK Stock Baskets do have financing cost (Rollover)
For more information on financing costs, please refer to:
<https://www.fxcm.com/uk/help/cfd-trading-what-is-the-index-cfd-financing-cost/>

Dividends and Withholdings

Dividend adjustments will apply on the eve of the ex-dividend date of the constituent members of the relevant Basket. The adjustment will appear on your statement and the amount of the adjustment per contract can be seen in the simple dealing rates window of the Trading Station platform in the day prior to the debit/credit.

Other Information

In the event that one of the individual components of a Basket does not receive a price update for 1 minute, the Basket will become temporarily untradeable. This may result in hanging orders on TS2 or Rejected orders on MT4*. We recommend trading with caution around any period of low liquidity. In the event of significant drawdown of one of the components or a corporate action, the Baskets may require a periodic rebalancing. In the event of a rebalancing a component of the basket may be replaced or all open positions may be closed with little or no notice.

***Currently ATMx is only available on Trading Station accounts.**

INDEX and CRYPTO BASKETS

USEquities

The USEquities basket is a unique product that combines the US30, SPX500, NAS100 and US2000 into one instrument and is a benchmark designed to reflect the change in value of the entire US share market.

The Index began on January 2, 2019, at a value of \$2,000. It represents the changes in value from inception, of \$500 position in each of the components.

Margin Requirements

To view current margin requirements, visit the below link:

<https://www.fxcm.com/uk/margin-updates/>

Trading Hours

Refer to the FXCM CFD Trading Hours PDF at:

<https://docs.fxcorporate.com/user-guide/FXCMCFDTradingHours.pdf>

Please note, however, that hours are subject to change based on Daylight Savings Time. Also, FXCM's Index Products do not expire, but FXCM indices will not be open for trading during [holidays](#) in which the reference markets are closed.

Maximum Contract Size

The maximum number of contracts per click (trade) for the USEquities is **200**.

Minimum Pip Cost (Value)

USEquities has a minimum value of \$1 per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value).

The pip/point location is shown in the diagram. Each 1.0 price movement on USEquities is 1 pip/point.

4550.90

Other Information

USEquities does have financing cost (Rollover). Applicable to most cash indices, dividend adjustments will apply on the eve of the ex-dividend date of the constituent members of the relevant Index. The adjustment will appear on your statement. For more information on financing costs and dividends, please refer to:

<https://www.fxcm.com/uk/help/cfd-trading-what-is-the-index-cfd-financing-cost/>

<https://www.fxcm.com/uk/help/cfd-trading-what-are-index-cfd-dividends/>

Note: Whenever an individual component (US30, NAS100, SPX500 or US2000) has a dividend adjustment, then USEquities will too.

CryptoMajors

CryptoMajors is not available to Retail Clients

The CryptoMajors basket is a unique product that combines Bitcoin (BTC/USD), Ether (ETH/USD), Litecoin (LTC/USD) and Bitcoin Cash (BCH/USD) into one instrument and is a benchmark designed to reflect the change in USD value of a basket of Cryptocurrencies with the highest market share at the time of the baskets inception.

The Index began on December 31st, 2020, at a value of \$100. It represent the changes in value from inception, of a \$25 position in each of the components:

<u>Coin</u>	<u>Weighting</u>
Bitcoin (BTC/USD)	25%
Ether (ETH/USD)	25%
Litecoin (LTC/USD)	25%
Bitcoin Cash (BCH/USD)	25%

Trading Hours

Please [click here](#) for trading hours (Refer to “All Cryptocurrencies”)

Please note, however, that hours are subject to change based on Daylight Savings Time. Any holiday hours will be posted on [here](#).

Spread

CryptoMajors has variable spreads that will widen and narrow subject to market conditions.

Max Contract Size

The maximum number of contracts per click (trade) for CryptoMajors is **200**.

Minimum Pip Cost (Value)

CryptoMajors has a minimum value of 1.00 USD per point (Your per point value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value).

The pip/point location is shown below. Each 1.00 price movement on the CryptoMajors is 1 pip/point.

220.14

Margin Requirements

CryptoMajors Margin Requirements are updated shortly after market open (Sunday 18:00 ET) and then updated between 17:00 ET to 18:00 ET daily.

CryptoMajors is leveraged at 2:1 and the new entry margin requirement will be the equivalent of half the notional value of 1 contract at 5pm EST.

For E.G if the CryptoMajors rate is 200.00 between 17:00 ET to 18:00 ET daily, the entry margin requirement for one contract will be updated to \$100.00 USD.

CryptoMajors is a volatile instrument and in the event that there is a significant intraday market move, margin requirements may be updated intraday

Overnight Funding

CryptoMajors does have an overnight funding charge (Displayed as Rollover in the Trading Station Platform).

The current overnight funding rate is 0% (annually) for short positions and -25% (annually) for long positions and is 3x on Fridays.

Trade Restrictions

FXCM allows long and short trading on all our trading catalog.

However due to the high volatility and low liquidity when trading crypto currencies, there may be instances where new positions are unable to be opened on CryptoMajors.

During any period in which CryptoMajors has a trading restriction applied, any market orders or triggered pending entry orders will be rejected and deleted.

Pop ups will appear on your screen informing of the reason for the rejection.

Other Information

In the event that one of the individual components of the Basket does not receive a price update for 1 minute, CryptoMajors will become temporarily untradeable. This may result in hanging orders on TS2 or Rejected orders on MT4. We recommend trading with caution around Market Open and Close and any other period of low liquidity.

SHARES

US Shares

The underlying Stocks for US Shares are traded on either the NASDAQ or NYSE. They can be identified by a .US at the end of the ticker symbol.

Trading Hours

Please [click here](#) for trading hours

Please note, however, that hours are subject to change based on Daylight Savings Time. Any holiday hours will be posted on [here](#).

Spread

US Shares have variable spreads that will widen and narrow subject to market conditions.

Max Contract Size

The maximum number of contracts per click (trade) for US Shares is **10,000**

Number of FXCM Contracts to one Share.

10 FXCM US shares contracts are currently equivalent to **1 Share**.

Minimum Pip Cost (Value)

US Shares have a minimum value of 0.001 USD per pip (Your per pip value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value).

The pip location is shown below. Each 0.01 price movement on US Shares is 1 pip.

845.56

Margin Requirements

US Shares leverages vary per product as the value is determined by FXCM based on market conditions. Margin is updated daily after market close as a % of the end of day rate.

Please check the [margin info](#) page for details on target margin %'s per instrument.

For E.G if a stocks midpoint is 200.00 during the market break, It would have a notional value of \$20 per 1 FXCM contract (as 1 FXCM = 0.1 Shares)

If the Margin Requirement for this instrument is listed as 20%, the margin will be updated to \$4 USD likewise

If the Margin Requirement for this instrument is listed as 50%, the margin will be updated to \$10 USD

Overnight Funding/Dividends/Withholdings

US Shares have financing cost (Rollover).

<https://www.fxcm.com/uk/help/single-share-cfds-faqs-what-is-the-single-share-cfd-financing-cost/>

Dividend adjustments will apply on the eve of the ex-dividend date of the underlying stock. The adjustment will appear on your statement. Long Positions will be Credited and Short Positions will be debited.

As per Section 871 of the US tax code. A 30% tax applies on dividend adjustments to traders of equity derivatives of US stocks. In accordance with FXCM's obligation under this US tax regulation, 30% of all Dividend credits are withheld and passed on by FXCM to the IRS.

When your account is debited, you are debited the full amount. However FXCM subsequently pass on 30% of that debit to the IRS.*

* This tax treatment is applied by default to all positions and may be subject to change in the future. Rebates may be available depending on your individual tax and residency circumstances, or may differ based on the respective jurisdiction. Please contact FXCM support if you believe you may be entitled to a rebate for additional information you will need to provide. This information is for references purposes only, and reliance on the information contained herein is not an alternative to legal advice from an attorney or other professional legal/accounting services provider. This information is not intended as a financial or an investment advice and must not be construed as such. Seek advice from a separate financial advisor. FXCM assumes no liability for errors, inaccuracies or omissions; does not warrant the accuracy, completeness of the information or other items contained within these materials.

Other Information

FXCM offer Micro Contracts for shares, where the pip cost of your position may be either less than 0.01 CCY or not a multiple of 0.01 CCY.

Please note that all Profit or Loss calculations are calculated and credited/debited to two decimals, and therefore rounding up or down may be required.

Charting

All Share/ETF CFD historical charting should be considered to be indicative in nature. FXCM stores Dealing data for the most highly active stocks, and is therefore able to provide Bid/Ask charts on the platforms. However, for most Share/ETF CFD instruments, FXCM utilizes exchange transactional data, which are the prices at which a seller and a buyer met in the underlying exchange. Exchange transactional data has several differences from Dealing data, and cannot be used to confirm execution of non-Exchange based trading. Please always refer to your rates window in the platform for real time Dealing pricing.

Trade Restrictions

Due to market conditions, certain share CFDs may have trading restrictions that are subject to change with no notice. Click [here](#) for more information.

Withholding Rebates

As per Section 871 of US tax code, a withholding tax applies on dividend adjustments to traders of equity derivatives of US stocks.

In accordance with FXCM's obligation under these US tax rules, 30% of all credited Dividend adjustments on US shares, ETFs or Stock Baskets are withheld and passed on by FXCM to the IRS.

If you are a taxpayer in a jurisdiction where a tax treaty exists that permits a lower withholding percentage and you qualify for the treaty benefit, you can submit a W-8BEN form (or other W-8 form based on your entity type) and FXCM will provide an adjustment to your account in the form of monthly rebate.

How to submit?

- Log in to [MYFXCM](#).
- Select "Upload Documentation" from the "My Info" dropdown.
- Choose "Other" and Provide details that you are "submitting W-8 for a reduction in withholdings."

Please Note:

- I. FXCM will confirm to you via email that your form has been processed.
- II. Rebates for the previous month will generally be credited within 2 weeks of the end of the month.
- III. FXCM Customer service staff are unable to provide you tax advice based on your individual circumstance or location.
- IV. Your details will remain valid for 3 years unless your tax or residency circumstances change, however eligibility may be subject to change without notice.

Corporate Actions

In the event of any corporate actions such as, but not limited to, stock splits, reverse stock splits, mergers, and spin-offs; FXCM shall determine in accordance with market practice the appropriate adjustment, if any, to be made to the current contract value or contract quantity of any open positions in order to preserve the economic equivalent of your position or to reflect the effect of the event on the relevant underlying share.

FXCM aims to open and close markets as close to the posted trading hours as possible, however in the event of certain corporate actions, FXCM may place trade restrictions, delay market open or bring forward market close. Depending on the type of corporate action, all open positions may potentially be liquidated and/or pending entry orders, stops and limits associated with the instrument may be cancelled. In this case clients would need to re-establish another position if desired and/or insert new stops and limits.

For more information on upcoming corporate actions and treatments visit our FAQ's at:

EU Shares

The underlying Stocks for EU Shares are traded on European Exchanges. The extension at the end of the ticker symbol will identify the country. The below table provides more information.

Due to market conditions, certain share CFDs may have trading restrictions that are subject to change with no notice. Click [here](#) for more information.

Corporate Actions

In the event of any corporate actions such as, but not limited to, stock splits, reverse stock splits, mergers, and spin-offs; FXCM shall determine in accordance with market practice the appropriate adjustment, if any, to be made to the current contract value or contract quantity of any open positions in order to preserve the economic equivalent of your position or to reflect the effect of the event on the relevant underlying share.

FXCM aims to open and close markets as close to the posted trading hours as possible, however in the event of certain corporate actions, FXCM may place trade restrictions, delay market open or bring forward market close. Depending on the type of corporate action, all open positions may potentially be liquidated and/or pending entry orders, stops and limits associated with the instrument may be cancelled. In this case clients would need to re-establish another position if desired and/or insert new stops and limits.

For E.G a stocks rate is 200.00 during the market break (Note that UK Shares are quoted in Pence, not Pounds), the Margin Requirement for one contract will be updated to 0.04 GBP

Please check the [margin info](#) page for details on target margin %'s per instrument.

Overnight Funding/Dividends/Withholdings

UK Shares have financing cost (Rollover).

<https://www.fxcm.com/uk/help/single-share-cfds-faqs-what-is-the-single-share-cfd-financing-cost/>

Dividend adjustments will apply on the eve of the ex-dividend date of the underlying stock. The adjustment will appear on your statement. Long Positions will be Credited and Short Positions will be debited.

Other Information

FXCM offer Micro Contracts for shares, where the pip cost of your position may be either less than 0.01 CCY or not a multiple of 0.01 CCY.

Please note that all Profit or Loss calculations are calculated and credited/debited to two decimals, and therefore rounding up or down may be required.

Charting

All Share/ETF CFD historical charting should be considered to be indicative in nature. FXCM stores Dealing data for the most highly active stocks, and is therefore able to provide Bid/Ask charts on the platforms. However, for most Share/ETF CFD instruments, FXCM utilizes exchange transactional data, which are the prices at which a seller and a buyer met in the underlying exchange. Exchange transactional data has several differences from Dealing data, and cannot be used to confirm execution of non-Exchange based trading. Please always refer to your rates window in the platform for real time Dealing pricing.

Trade Restrictions

Due to market conditions, certain share CFDs may have trading restrictions that are subject to change with no notice. Click [here](#) for more information.

Corporate Actions

In the event of any corporate actions such as, but not limited to, stock splits, reverse stock splits, mergers, and spin-offs; FXCM shall determine in accordance with market practice the appropriate

adjustment, if any, to be made to the current contract value or contract quantity of any open positions in order to preserve the economic equivalent of your position or to reflect the effect of the event on the relevant underlying share.

FXCM aims to open and close markets as close to the posted trading hours as possible, however in the event of certain corporate actions, FXCM may place trade restrictions, delay market open or bring forward market close. Depending on the type of corporate action, all open positions may potentially be liquidated and/or pending entry orders, stops and limits associated with the instrument may be cancelled. In this case clients would need to re-establish another position if desired and/or insert new stops and limits.

Exchange-Traded Funds (ETFs)

An exchange-traded fund (ETF) is an equity security that provides exposure to an index, a basket of assets, a commodity or an investment strategy. An ETF combines the features of a mutual fund with the functionality of conventional stock trading.

US ETFs

The underlying ETFs for US ETFs are traded on either the NASDAQ or NYSE. They can be identified by a .US at the end of the ticker symbol.

Trading Hours

Please [click here](#) for trading hours

Please note, however, that hours are subject to change based on Daylight Savings Time. Any holiday hours will be posted on [here](#).

Spread

US ETFs have variable spreads that will widen and narrow subject to market conditions.

Max Contract Size

The maximum number of contracts per click (trade) for US ETFs is 10,000

Number of FXCM Contracts to one ETF.

10 FXCM US ETF contracts are currently equivalent to 1 ETF.

Minimum Pip Cost (Value)

US ETFs have a minimum value of 0.001 USD per pip (Your per pip value may be different if your account is denominated in a different currency. Please refer to the Simple Dealing Rates Window in Trading Station for this value).

The pip location is shown below. Each 0.01 price movement on US Shares is 1 pip.

845.56

Margin Requirements

US ETFs leverages vary per product as the value is determined by FXCM based on market conditions. Margin is updated daily after market close as a % of the end of day rate. Please check the [margin info](#) page for details on target margin %'s per instrument.

For E.G if an ETFs midpoint is 200.00 during the market break, It would have a notional value of \$20 per 1 FXCM contract (as 1 FXCM = 0.1 ETF Shares)

If the Margin Requirement for this instrument is listed as 20%, the margin will be updated to \$4 USD Likewise If the Margin Requirement for this instrument is listed as 50%, the margin will be updated to \$10 USD.

Overnight Funding/Dividends/Withholdings

US ETFs have financing cost (Rollover).

<https://www.fxcm.com/uk/help/what-is-the-exchange-traded-fund-etf-cfd-financing-cost/>

Dividend adjustments will apply on the eve of the ex-dividend date of the underlying ETF. The adjustment will appear on your statement. Long Positions will be Credited and Short Positions will be debited.

As per Section 871 of the US tax code. A 30% tax applies on dividend adjustments to traders of equity derivatives of US Shares or ETFs. In accordance with FXCM's obligation under this US tax regulation, 30% of all Dividend credits are withheld and passed on by FXCM to the IRS.

When your account is debited, you are debited the full amount. However FXCM subsequently pass on 30% of that debit to the IRS.*

* This tax treatment is applied by default to all positions and may be subject to change in the future. Rebates may be available depending on your individual tax and residency circumstances, or may differ based on the respective jurisdiction. Please contact FXCM support if you believe you may be entitled to a rebate for additional information you will need to provide. This information is for references purposes only, and reliance on the information contained herein is not an alternative to legal advice from an attorney or other professional legal/accounting services provider. This information is not intended as a financial or an investment advice and must not be construed as such. Seek advice from a separate financial advisor. FXCM assumes no liability for errors, inaccuracies or omissions; does not warrant the accuracy, completeness of the information or other items contained within these materials.

Other Information

FXCM offer Micro Contracts for ETFs, where the pip cost of your position may be either less than 0.01 CCY or not a multiple of 0.01 CCY.

Please note that all Profit or Loss calculations are calculated and credited/debited to two decimals, and therefore rounding up or down may be required.

Charting

Exchange transactional data has several differences from Dealing data, and cannot be used to confirm execution of non-Exchange based trading. Please always refer to your rates window in the platform for real time Dealing pricing.

Trade Restrictions

Due to market conditions, certain ETFs may have trading restrictions that are subject to change with no notice. Click [here](#) for more information.

Withholding Rebates

As per Section 871 of US tax code, a withholding tax applies on dividend adjustments to traders of equity derivatives of US stocks and ETFs.

In accordance with FXCM's obligation under these US tax rules, 30% of all credited Dividend adjustments on Shares, ETFs, or Stock Baskets are withheld and passed on by FXCM to the IRS.

If you are a taxpayer in a jurisdiction where a tax treaty exists that permits a lower withholding percentage and you qualify for the treaty benefit, you can submit a W-8BEN form (or other W-8 form based on your entity type) and FXCM will provide an adjustment to your account in the form of monthly rebate.

How to submit?

- Log in to [MYFXCM](#).
- Select "Upload Documentation" from the "My Info" dropdown.
- Choose "Other" and Provide details that you are "submitting W-8 for a reduction in withholdings."

Please Note:

- V. FXCM will confirm to you via email that your form has been processed.
- VI. Rebates for the previous month will generally be credited within 2 weeks of the end of the month.
- VII. FXCM Customer service staff are unable to provide you tax advice based on your individual circumstance or location.
- VIII. Your details will remain valid for 3 years unless your tax or residency circumstances change, however eligibility may be subject to change without notice.

Corporate Actions

In the event of any corporate actions such as, but not limited to, stock splits, reverse stock splits, mergers, and spin-offs; FXCM shall determine in accordance with market practice the appropriate adjustment, if any, to be made to the current contract value or contract quantity of any open positions in order to preserve the economic equivalent of your position or to reflect the effect of the event on the relevant underlying share or etf.

FXCM aims to open and close markets as close to the posted trading hours as possible, however in the event of certain corporate actions, FXCM may place trade restrictions, delay market open or bring forward market close. Depending on the type of corporate action, all open positions may potentially be liquidated and/or pending entry orders, stops and limits associated with the instrument may be cancelled. In this case clients would need to re-establish another position if desired and/or insert new stops and limits.
